

AGGREGATED UNDERWRITER & EXPORTER DATA FEED TERMS

COMMERCIAL DATA LICENSE | AGRI-INSURERS & EXPORT SYNDICATES

1. PROPRIETARY DATA ASSET

1.1 Simple Solutions licenses compiled, statistical, scrubbed data streams, risk matrices, and operational audit indices ('The Compliance Index') to commercial agricultural underwriters, risk assessors, and export consortia.

2. POPIA DE-IDENTIFICATION AND ANONYMIZATION WARRANTY

2.1 Statutory Anonymization: In strict compliance with Section 1 and Section 6 of POPIA, Simple Solutions warrants that The Compliance Index consists exclusively of De-Identified Data.

2.2 Suppression Architecture: The data feeds are engineered such that:

- **No Individual Identification:** No individual human Data Subject can be identified, contacted, or profiled.
- **k-Anonymity Suppression:** Micro-cohort suppression ($k\text{-anonymity} \geq 5$) is strictly applied across all demographic, role-based, and regional reporting categories.
- **Estate Pseudonymization:** Farm identifiers are pseudonymized or aggregated into regional agricultural clusters (e.g., Lowveld Macadamia, Tzaneen Citrus, Kiepersol Valley) to protect trade secrets, commercial yield projections, and confidential supply volumes.

3. 'AS-IS' DATA LICENSE AND LIMITATION OF LIABILITY

3.1 Statistical Benchmark Only: The Compliance Index reflects recorded platform activity, induction frequencies, and risk assessment intervals as reported by participating agricultural estates.

3.2 No Underwriting Guarantee: Simple Solutions does not warrant that any individual producer evaluated via the Index will remain free from occupational accidents, crop loss, or audit failure. The licensee underwriter or exporter utilizes the data at its sole commercial discretion.
