

COOKIE & LOCAL STORAGE POLICY

TECHNICAL PRIVACY NOTICE | THE VAULT (SIMPLEZA.CO.ZA)

1. INTRODUCTION

1.1 Simple Solutions (Pty) Ltd ('we', 'us', or 'our') utilizes cookies and local browser storage technologies on our website (simpleza.co.za) and our digital portal, 'The Vault'. This policy explains what these technologies are, how we use them, and your controls regarding their use.

2. CATEGORIES OF STORAGE TECHNOLOGIES WE USE

2.1 Strictly Necessary / Functional Technologies: These are essential for the operation of The Vault and cannot be disabled. They include:

- **Proprietary Session Tokens:** Custom-built authentication tokens and JSON Web Tokens (JWT) that maintain secure user login states, prevent unauthorized session hijacking, and enforce row-level tenant isolation.
- **Payment Routing:** Secure session tokens from Paystack required to execute encrypted financial transactions.
- **Offline State Management:** Local browser caching enabling offline drafting of worker registers and assessment checklists during poor farm connectivity.

2.2 Performance & Analytical Telemetry: We utilize aggregated analytical markers to track feature adoption, video completion latency, and system response times. This data is collected in aggregate and does not profile individual users.

3. USER CONTROLS

3.1 Browser Settings: Most web browsers accept cookies by default. You may configure your browser to reject cookies; however, disabling Strictly Necessary cookies will prevent authentication and disable core functionality within The Vault.
