

CORPORATE PARTNER DATA SHARING & SUBSIDY AGREEMENT

B2B CONTRACT FOR PACKHOUSES, PROCESSORS & CO-OPERATIVES

PARTIES TO THIS AGREEMENT

1. SIMPLE SOLUTIONS (PTY) LTD Registration / VAT Number: 28911466, Southbroom, 4277 ('Simple Solutions')

2. THE CORPORATE PARTNER Commercial Packhouse, Processor, Co-operative, or Agricultural Exporter ('Corporate Partner')

1. PURPOSE AND SUBSIDY FRAMEWORK

1.1 The Corporate Partner sponsors, subsidizes, or facilitates account access for its supplying primary producers ('Growers') via allocated Grower Codes.

1.2 Simple Solutions provides discounted or subsidized platform access to linked Growers to promote compliance with SIZA Social/Environmental, GlobalG.A.P. IFA, and OHSA standards across the Corporate Partner's supply chain.

2. SCOPE OF CORPORATE DASHBOARD DATA VISIBILITY

2.1 Authorized Telemetry Metrics: The Corporate Partner shall have access strictly to high-level compliance manifests across linked estates, comprising:

- **Estate Details:** Grower business name, estate ID, and allocated Grower Code.
- **Subscription Status:** Active subscription, subsidized tier status, and crop pack activations.
- **Induction Activity:** Total worker training logs completed over rolling 90-day cycles.
- **Curriculum Metrics:** Distinct safety modules executed and date of latest training session.
- **Risk Review Overdue Flags:** Overdue statutory Baseline Risk Assessment review notices.
- **Dark Supplier Alerts:** Notification flags indicating supplying estates with zero logged inductions for greater than 60 continuous days.

3. STRICT PRIVACY WALL (ZERO WORKER-LEVEL EXPOSURE)

3.1 Prohibition of Worker Data Access: The Corporate Partner is STRICTLY PROHIBITED from accessing, querying, or downloading individual worker personal records, names, employee/clock numbers, gender breakdowns under suppressed cohorts, or worker digital signatures.

3.2 Immutable System Barrier: Simple Solutions warrants that its custom-built backend enforces automated database views and role-based access restrictions preventing Corporate Partners from accessing raw operational registers.

4. AUDIT DUE DILIGENCE & FAIR COMPETITION

4.1 Audit Verification: The Supply Chain Statutory Compliance Manifest generated via The Vault serves as proof of supply-chain due diligence. Simple Solutions certifies solely that the system records training events logged by Growers; it does not warrant that a Grower is inherently safe or compliant with all labor laws.

4.2 Non-Interference: The Corporate Partner shall not utilize compliance telemetry to engage in unlawful anti-competitive trade practices, unfair producer penalties, or arbitrary produce rejection in contravention of the Competition Act 89 of 1998.
